

## Information

<b>Name</b>	Online High Level Conference on Synthetic SAF
<b>When?</b>	Monday, February 8th, 2021
<b>Time?</b>	10:00 - 13:00 CET
<b>Where?</b>	Braodcasted live from The Hague

To speed-up the European dialogue on Synthetic SAF and offer a stage to a range of initiatives, the Minister of Infrastructure and Water Management, Cora van Nieuwenhuizen, will host an Online High Level Conference on Synthetic SAF. The goal is to create favorable conditions in order to ramp up the production and deployment of synthetic fuels. The event will take place on February 8, 10:00-13:00 (CET) and you are most welcome to join.

Sustainable aviation fuels (SAF) will have a significant role in reducing the carbon footprint of the aviation sector in the coming years. It is important that with the economic recovery of the aviation sector, there is no backsliding in the reduction of emissions in the aviation industry. Recovery should go hand in hand with accelerating the environmental transition of the sector in order to contribute to the fight against climate change and the achievement of Europe's climate goals. Therefore, the Netherlands will organize a conference on SAF, with a special focus on synthetic fuels.

See the attachment for the program of the conference.

The event is open to all to follow online and will be of interest to aviation policymakers, airline and airport stakeholders, environmental stakeholders, aviation academics, representatives of financial institutions and international and regional organizations. If you know of anyone else who would like to register, please let them register via [this link](#).

If you have any questions please contact the organisation via [SAF-conference@congresbureau.nl](mailto:SAF-conference@congresbureau.nl) or +31 (0)30 275 96 27.

Kind regards,

Online High Level Conference on Synthetic SAF Team
