

Road Vehicle Automation in sustainable urban mobility planning

Gepubliceerd 12-apr-22 11:30 door [Kees van Son](#)

Beschrijving

Vehicle manufacturers have already started with the introduction of vehicles with more and more connected and automated functionalities. But although steps towards the deployment of cooperative, connected and automated mobility (CCAM) are progressing fast, the actual benefits of the transition towards CCAM for a city's mobility, will largely be determined by the introduction this new driving technology into existing sustainable urban mobility planning proces.
